

TESTED IN WAR. NEVER BEATEN

The genuine Snugpak 'Merlin Softie 3' Sleeping Bags

- The original **SNUGPAK 'Merlin Softie 3'** sleeping bag as used by the British and Australian Armed Forces in East Timor, Afghanistan and Iraq is now widely available in Australia.
- This bag packs so small you can hold it in the palm of your hand.
- Weighs only approx 800g, but can keep you warm down to about 0°C even if it gets damp or wet.
- Now with a light and heat absorbing black ground liner we call 'Rapidry' Paratex, a rip-stop man-made silk that enables a damp bag to dry in minutes.
- The inner lining is world renowned Pertex. Like human skin it allows perspiration out, but prevents moisture getting in.
- Fitted with a special tough foot reinforcement section allowing you to sleep with your boots on.
- The filling is 'profiled', meaning it requires no stitching or quilting to keep the filling in place and no cold spots along quilting lines as in other bags. The filling is always able to regain its full loft, trapping more air and retaining more body warmth.
- And it's the only bag with a layer of 'Reflecta-Therm', a lightweight aerospace fabric that reflects 15% more body warmth back into the bag, without any noticeable weight addition.
- If you have to operate light, pack small and need a bag that will keep you warm without unnecessary added weight, one that can be machine washed and quickly dried and quality made in the UK, then you can't go past the **SNUGPAK 'Merlin Softie 3'** code green bag with the black ground liner.
- There are, of course, other Snugpak military bags that are rated well below zero degrees, but they are naturally a little heavier and bulkier. Details on application.
